

## Shipping Instructions

1. Dry salted skins should be shipped in a cardboard box or a wooden crate. Do not ship skins in plastic bags, as they retain moisture and may cause bacteria action to speed up.
2. Each shipment should contain a packing list detailing the contents of that shipment. Packing lists are available upon request or can be downloaded from our website.
3. Each box should also have a shipping label affixed to it. This label should include your name, address and phone number or e-mail address. Shipping labels are also available upon request.
4. If shipping more than one box, please indicate the number box it is of the entire shipment (i.e. Box 1 of 4, etc.).
5. It is recommended that you keep record of the tracking numbers on each shipment, in order to confirm delivery or track lost boxes.
6. Hides are checked in completely on a daily basis. If you have not received a confirmation from us within a reasonable amount of time please contact us.
